DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 and 23-24, drawn to mutated yeast strains and methods of making, classified in class 435, subclass 254.21.
- II. Claims 20-22 and 25, drawn to doughs and process for making doughs with the yeast of Group I, classified in class 426, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

The yeast and methods of making in Group I are patentably distinct and unrelated to the dough products and methods of Group II. While the doughs of Group II recite a composition comprising a yeast encompassed by Group I, the doughs of Group II can be made using other, materially different yeasts, such as other freeze-resistant yeast strains, with or without the addition of cinnamon to the dough.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
